

Antibacterial
paper

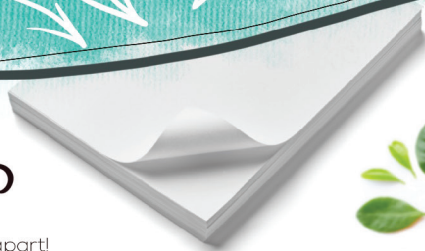

papir za dom in pisarno

COPY PAPER

nova

Stay together, keep apart!

Radeče papir nova presents an **innovative paper** that provides antibacterial protection

The new paper with antibacterial protection
is a significant novelty in the family of **R Copy Paper®**
products for everyday office and home use.

Bacteria are our constant invisible companions.
Many of them are pathogenic and therefore cause disease.
The easier it is to transfer bacteria, the faster they spread.
Materials such as paper can become potential
transmission points for their spread.

Antibacterial protection is added during
the manufacture of paper, to provide a reliable
and durable antimicrobial effect against a
large number of bacteria.
